EDUCATION

University of Ilorin

Bachelor of Science in Computer Science

Ilorin, Nigeria

June 2021 – July 2025

Ansar-ud-deen Grammar School

High School Diploma

Lagos, Nigeria

Class of 2020

EXPERIENCE

Frontend Engineer

D'Accubin

Aug. 2025 – Present

Lagos, Nigeria (Hybrid)

- **Feature Development:** Driving the development and implementation of new, complex user-facing features across core application modules, translating high-fidelity designs into pixel-perfect, interactive web interfaces using various technologies.
- **Scalable Architecture:** Designing and implementing modular, highly scalable component architectures and state management solutions to ensure long-term stability and maintainability of the codebase.
- **Performance and Debugging:** Independently diagnosing and resolving critical bugs and performance bottlenecks, optimizing rendering times and network requests to significantly improve application speed and responsiveness.
- **Code Quality Structure:** Authoring clean, well-structured, and reusable code, and actively participating in rigorous code reviews to uphold team standards, ensure consistency, and enforce application-wide architectural guidelines.
- **API Integration:** Collaborating directly with Backend Engineers to define and consuming various APIs, including RESTful, SOAP, and GraphQL, ensuring seamless data flow and efficient integration between the client and server.
- **Cross-Functional Collaboration:** Working effectively within an Agile team structure, interfacing with UI/UX designers and QA teams to refine technical specifications and deliver features that meet both technical requirements and user expectations.

Junior Full Stack Developer (Internship)

D'Accubin

May 2024 – Oct. 2024

Lagos, Nigeria

- **Frontend Development:** Developed and maintained user interfaces using HTML, CSS, Blade, Javascript and React Collaborated with designers to implement responsive and user-friendly web pages.
- **Backend Development:** Assisted in building and maintaining server-side logic using Node.js Worked with databases such as MongoDB and PostgreSQL to manage data. Created and maintained API endpoints to facilitate communication between frontend and backend.
- **Software Testing Quality Assurance:** Identified and reported bugs, and worked with other developers to resolve issues. Conducted performance testing to ensure software meets required standards.
- **Documentation of APIs:** Wrote clear and comprehensive API documentation. Maintained and updated documentation as APIs evolve. Ensured documentation is user-friendly and accessible to developers and non-developers.

Junior Frontend Developer (Internship)

D'Accubin

May 2022 – Dec. 2022

Lagos, Nigeria

- Developed and maintained user interfaces using HTML, CSS, Blade, JavaScript, and React.
- Collaborated with designers to implement responsive and user-friendly web pages during a focused frontend internship.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Dart, Golang, SQL (PostgreSQL), HTML/CSS

Frameworks: React.js, Next.js, Node.js, Express.js, React Native, Flutter, Blade

Developer Tools: Git, Docker, TravisCI, Google Cloud Platform, VS Code

Libraries/Other: SASS, MongoDB, GraphQL, RESTful APIs, SOAP
